

endpointX is an **experienced**, **certified** and **reliable** professional services company focused on Tanium. We have managed Tanium at some of the largest and most complicated environments globally, and provide that level of comfort and reliability to our customers

## Experienced

We have both prior experience running Tanium, and a wide-ranging set of customers that trust us to run their Tanium platform

## Certified

We are always certified with any certification & training Tanium provide. We are the **first** certified Tanium deploy and support partner globally

## Reliable

We provide an intimate service with a direct line to named engineers, all of whom are on-shore and highly experienced practitioners
