Autopilot for your IT.

## COMPANY OVERVIEW

From the core to the edge to the cloud, vCORE Technology Partners makes IT transformation a reality with proven expertise in cloud & automation, modern infrastructure, networking and security.

Our technology platform provides the simplicity, security and flexibility required to make clients' organizations more agile, more efficient and more successful.

### vCORE At a Glance

vCORE Technology Partners was founded in 2010 with a vision to transform the IT Solution Provider industry with an engineering-centric business model, a focus on client success and US-based, 24x7x365 IT support.

#### 7:1 Engineer-to-Sales Ratio

We invest heavily in engineering talent to ensure we can provide valuable technical resources.

#### 100+ OEM Partners

We leverage partnerships with the world's leading technology manufacturers.

#### Enterprise-class expertise

Our clients include multibillion-dollar enterprises across a wide range of industries.

## ENGINEERING EXCELLENCE

vCORE differs from many IT solution providers in the deep engineering talent we've assembled to assist clients in solving complex, enterprise-level challenges. We provide end-to-end support, from discovery and architecture to delivery, integration and managed services.

## MANAGED SERVICES

vCORE provides managed IT services from a highly secure, US-based Enterprise Operations Center, with 24x7x365 monitoring and proactive management of specific systems or the client's entire environment.

Our IT OaaS team has experience managing complex environments for Fortune 500 enterprises and can quickly scale to fit each client's individual needs.
