

NETBUILDER & TANIUM STRATEGIC PARTNERSHIP

AN ARCHITECTURE THAT TURNS DECENTRALISATION AND SCALE INTO AN ADVANTAGE

— Tanium

NETbuilder

NETbuilder has a 20-year history of providing creative, software, consulting and managed services. Much of the consulting and development has been using emerging technology. NETbuilder specializes in helping departments uniquely build their own in-house delivery capability with skilled engineers, creating a Centre of Excellence as part of the engagement with the enablement of continuous delivery with well-defined processes and outcomes.

Unified Endpoint Security (UES)

- ✓ Asset Discovery & Inventory
- ✓ Data Risk & Privacy
- ✓ Endpoint Detection & Response
- ✓ Endpoint Protection
- ✓ Vulnerability & Configuration Management

Unified Endpoint Management (UEM)

- ✓ Performance Monitoring
- ✓ Asset Discovery & Inventory
- ✓ Patch Management
- ✓ Software Management
- ✓ Configuration Management

Tanium provides unified endpoint management and security built for the world's most demanding IT environments. Our breakthrough approach decentralizes data collection, aggregation and distribution down to the endpoint, dramatically reducing direct client-to-server communications to deliver transformational scale, speed, and reliability. This is why the world's most sophisticated organizations -- including nearly half of the Fortune 100 -- trust Tanium to help them confidently manage performance, detect and respond to threats, and ensure compliance across their operations.

Managed Services

We provide world-class Tanium Managed Services for your Tanium cloud infrastructure, application and operations with tailored models, dedicated solutions and DevOps experts for all Tanium Core Platform applications. You select the plan that adapts to your needs and we start running your operations for you.

System Design & Integration

We offer end-to-end system design and integration services for the Tanium Platform, providing full delivery lifecycle through planning, design, build, launch and support of your custom solution. We have various engagement models and an agile delivery approach that enable rapid time-to-market, high-quality solution.

Solution Assessment

We offer an independent assessment service for the Tanium Core Platform, reporting through audit, design and plan of your strategy, process, architecture and implementation. We deliver personalized and impartial recommendations and rapid development of a tailored consolidation program.

Tanium's Unified Endpoint Management and Security Platform Closes IT Gaps

WHILST NETBUILDER ACCELERATES YOUR DIGITAL TRANSFORMATION

Reduce Complexity

Eliminate the need for point solutions, reduce your infrastructure costs and close the visibility gap that siloed tools and complex environments create.

Improve Efficiency

Reduce the time and resources needed to perform critical business processes and adapt to disruptions to close the resilience gap and ensure business continuity.

Align Teams

Break down information silos between security and operations teams. Ensure consistent data to close accountability gaps created by disparate teams and systems.
