

Cyber Fusion.

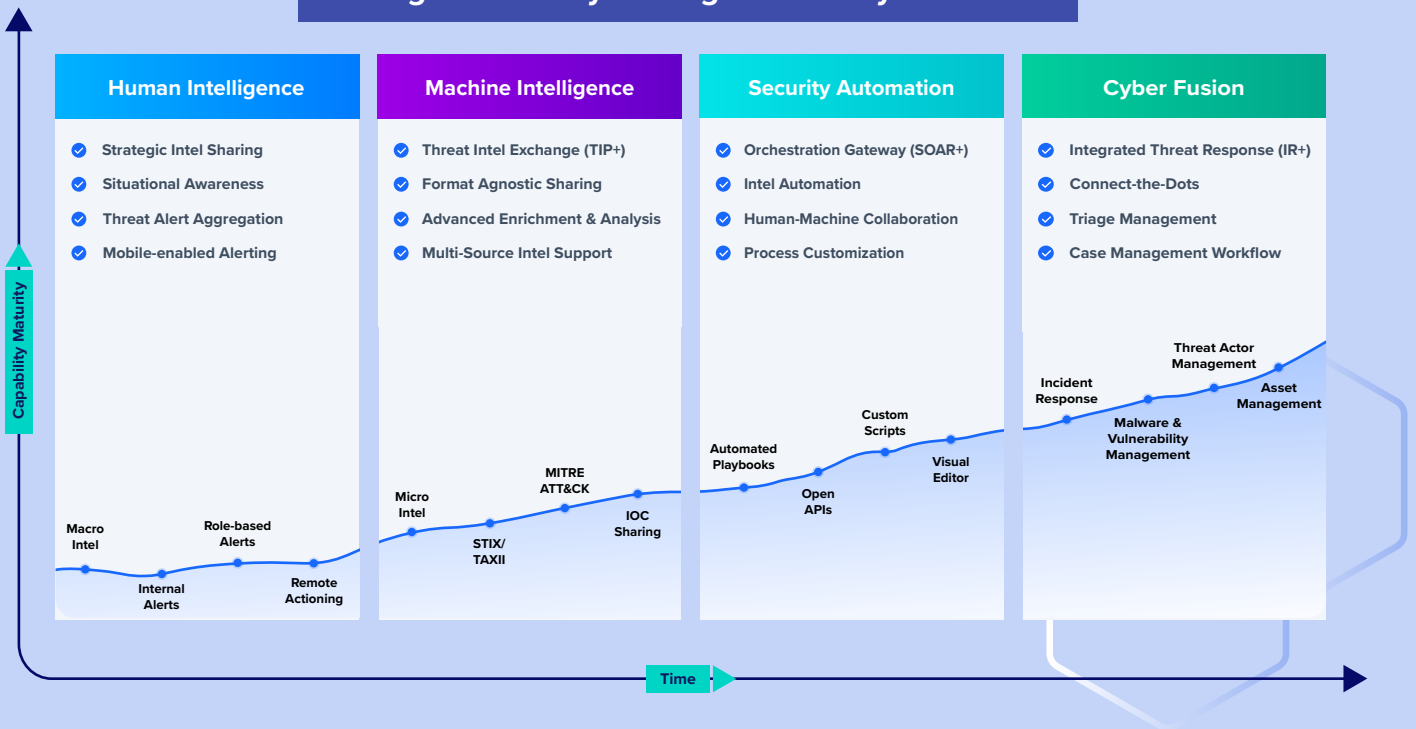

Next-generation SOAR and Threat Intelligence Solved

ABOUT CYWARE

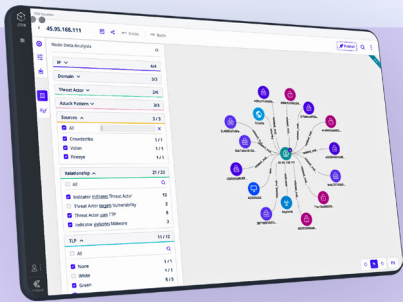

Cyware builds Virtual Cyber Fusion Centers offering next-gen SOAR and threat intelligence automation for enterprises, ISACs/ISAOs, MSSPs, and government organizations across the globe. Cyware offers a full-stack of innovative virtual cyber fusion solutions for threat intelligence analysis and sharing, incident response, security automation and orchestration (SOAR).

Intelligent Security Through Virtual Cyber Fusion

OUR PRODUCTS

Cyware's virtual cyber fusion suite delivers advanced capabilities for strategic and technical threat intelligence sharing, and security orchestration, automation, and response (SOAR) in a truly modular and integrated manner.

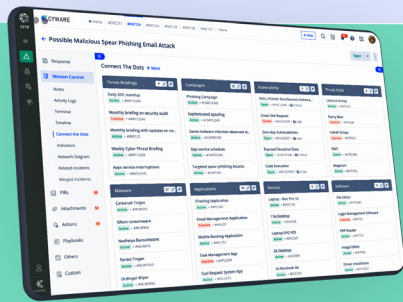

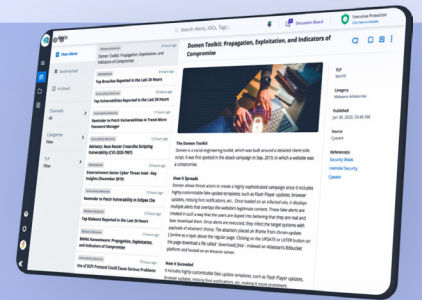

Cyware Threat Intelligence eXchange [CTIX]

Advanced Threat Intelligence Platform (TIP) for automated ingestion, enrichment, and analysis of threat indicators (IOCs) in a collaborative and bidirectional sharing ecosystem.

Cyware Situational Awareness Platform [CSAP]

Mobile-enabled automated alert aggregation, dissemination, and strategic threat intelligence sharing for real-time situational awareness and enhanced collaboration between an organization's security teams.

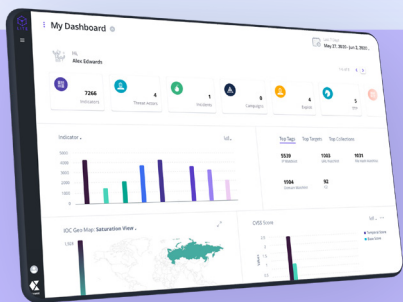

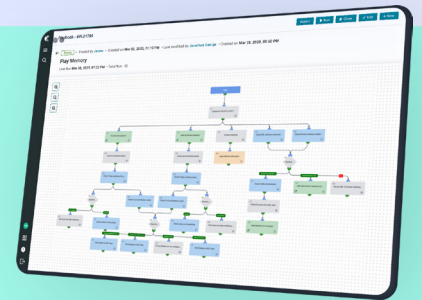

Cyware Fusion and Threat Response [CFTR]

Automated incident analysis and response platform designed to provide end-to-end threat visibility between silo'd security teams against malware, vulnerabilities, and threat actors by connecting-the-dots in real-time.

Cyware Security Orchestration Layer [CSOL]

Universal, Independent Security orchestration and automation (SOAR) module for connecting cybersecurity tools with any IT, DevOps, and Business tools in your on-premise or cloud environment.

Cyware Threat Intelligence eXchange Lite [CTIX Lite]

The First Fully Automated, Robust Cloud Native Threat Intelligence Platform (TIP) for Mid Market Organisations with Small to Mid-Sized Security Teams
